ABSTRACT OF THE DISCLOSURE

To provide an image display device, such as a liquid crystal ~~television~~-receiver or the like, that has a printer incorporated therein for printing a displayed image on the ~~spot~~.spot,
———~~Upon~~upon switching-on of a television receiver-10, an image forming device 16 goes
~~into action~~is activated and ~~television~~-images or the like are projected onto a display screen-14.
Here, by appropriately operating an operation section 25-or the like, a command requiring
images being displayed on the display screen 14-to be printed out, is inputted into the image
forming device-16. As a result, the printing command signal is issued from the data
processing section 81-provided in the output section 80-to the printer unit-23, together with an
image file appropriately converted from video signals. The printer unit 23-develops the
~~inputted~~input image file, prints the corresponding image, and outputs it.
